## The City of Lincoln is going green with Pervious Concrete

The City of Lincoln is Practicing before they Preach. This pervious concrete urban retrofit is the second specified pervious concrete pavement in the city of Lincoln. The project is just under 3000 sf of pervious. The City of Lincoln, EA Engineering, Stephens and Smith Construction, and Ready Mixed Concrete Lincoln gave the Nebraska Concrete & Aggregates Association an opportunity to promote pervious concrete.

With just over 100 attendees, the audience observed the difference in placing methods of pervious concrete along with the environmental benefits of this product. Channel 8 Eye Witness news even stopped by to see what all the hype was about, giving pervious concrete a nice plug.

A special thanks to J.D. and Dave T. with Stephens and Smith for letting us come to their jobsite. The S&S boys are NRMCA Pervious Concrete Contractor Certified and did an excellent job paying attention to details and put down a great product.
