AIA 2007 Fall Conference

The NC&AA hosted an exhibit booth at the 2007 AIA Fall Conference. This one day event drew in more than 150 architects from around the state. The conference theme was “Green and Sustainable Design”. The Association exhibited Pervious Concrete, concrete movies and picture slideshows, and a literature rack filled with substantiated evidence on how concrete is green.

Special thanks to ACI President Kirk Havranek, National Committee Chair Norm Nelson, and promotion committee chair Tim Hegeholz for their assistance throughout the day.
