Chief Industries
Concrete Pavement Analyst

The NC&AA presented our concrete pavement analyst software to the sales and estimating team of Chief Construction in Grand Island. Chief self performs their concrete operations and needed some information on the benefits of concrete parking lots to be able to communicate this information to their clients.

Chief Industries, Inc., a Grand Island, Nebraska based multi-product manufacturer, produces and markets grain storage, handling and conditioning products; pre-engineered metal farm utility, grain storage, post frame and commercial building systems; custom steel fabrication; factory built housing; recreational vehicles; wastewater treatment systems; security doors, windows and related furniture; Intermodal equipment, railroad box car doors and related equipment plus ethanol and high protein feed. The company also has a common carrier subsidiary, a construction division and two manufactured housing retail lots.

Special thanks to Merlyn Hansen and Paul Dravitzki for recommending the association for continuing education.
