CRAMER KRESKI DESIGN BOXED LUNCH *NC&AA SPEAKS ON RESIDENTIAL CONCRETE*

Steve Wobken, technical service rep for Ashgrove Cement Company, presented a one hour lecture on residential concrete. Steve covered the basics of concrete to local building codes. The emphasis of the lunch was aimed to improve specifications for residential concrete.

Thank you for lunch's taking some time to come to our office. Your presentation was a great introduction to concrete for our newest interns and answered many of the questions we had. We appreciate the resources you put together for us, I am sure they will be used. The information you provided will help insure we deliver quality homes our clients can depend on.
